

# ROTHENBERGER

## FREEZE-PAK

### INSTANT PIPE FREEZING KIT

**Produces an ice plug in  
10 minutes that will last  
upto 30 minutes**

(dependent on water and room temperature)

- Quick and easy to use
- No need to drain down
- Will freeze copper, lead, steel & plastic pipes
- Size range Ø 8 - 28 mm (5/16"-1")
- Can be used on horizontal & vertical pipes
- Safe to use CFC free
- Ideal solution for emergency repairs
- Kit contains:
  - 500g Can of Quick Freeze spray
  - 2 Quick Freeze jackets, 4 Cable ties

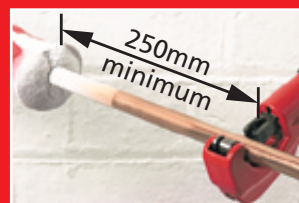

Art.-No. 6.4004

## FREEZE-PAK INSTANT PIPE FREEZING KIT

### OPERATING INSTRUCTIONS: PLEASE READ CAREFULLY BEFORE STARTING WORK.

- Turn off all taps and central heating pumps.
- Turn off all water heaters.
- Water must be cold and still before freezing.
- Position jacket around pipe with the seam uppermost.
- Secure tightly to pipe with cable ties supplied.
- Insert feed tube in nozzle of can and through the access hole in the freezer jacket.
- Holding the can upright, inject Quick-Freeze into jacket.
- Should liquid refrigerant appear, pause briefly and allow to evaporate. Then restart.
- Inject the correct amount according to the table shown. Wait at least 10 minutes to allow ice plug to form.
- Should the water be treated with an inhibitor or anti-freeze wait for a further 3-4 minutes.

- A horizontal pipe is easier to freeze but if a vertical pipe requires freezing, use cable ties around the base and ensure the bottom of the freezing jacket is tightly sealed with tape.
- Insert Quick-Freeze from the top.
- Ensure jacket is at least 250mm from work point.
- The ice plug should last up to 30 minutes (dependent on water and room temperature).
- Top up with Quick-Freeze as necessary.
- Ensure you have sufficient spare Quick-Freeze to complete the work.

Pipe Diameter		Cylinder	
Copper	Steel/Lead/Plastic	300g	500g
8, 10, 12 mm	1/4" - 3/8"	1	1/2
15 mm	1/2"	1	1/2
22 mm	3/4"	-	1
28 mm	1"	-	1

#### CAUTION
